

# Technical Requirements

## 360° show

The ideal useful **surface** is 8m in diameter for 7m in height. It must be hard, smooth, stable, level and adherent. (For example, where you can go on roller skates). The LINOLIUM is ideal.

The **audience** is around the space sitting in carpet or/and chairs.

**Audio:** The sound equipment is the responsibility of the organizer, unless previously agreed with the use of the artist. Music managed by a technician. A minijack cable is required to plug the computer to the music system.

**Lighting**, at least 4 spotlights behind the audience, 3 meters high, directed to the useful surface. Minimum total power of 1500W. Responsibility of the organizer.

## OTHER NEEDS

- An indoor place where I can set up the material for the show.
- Shower is needed after the show.

## ADDITIONAL INFORMATION

- 10 minutes test of the floor, 1h before the show.
- SET UP: 30min
- DISASSEMBLE: 30min
