

# DUO X CASO

## Technical Rider “Solo de Dos”

**Duration of the performance:** 40min

**Audience:** 180 Grades (Half-circle)

**Space needed:** 7x7 Meter minimum, the floor should be flat and smooth. (NO GRASS, GRAVEL or SAND!)

The working space must be clean for the assembly to be carried out.

The transport of all the material provided by the company will be carried out in a van of 2.8m high, 2m wide and 5.6m long, reserving a suitable loading and unloading space and a parking area.

### **Sound:**

**For Streetshows:** The company uses its own Soundsystem: Samson 106 XP (50Watt/104dB, autonom Soundsystem)

**For Stages or more than 150 Persons Audience:** The company can offer its own 1000Watt Soundsystem (but this includes extracosts!!! and extratime at the setup!!!) or we use the Soundsystem from the organizer! Therefore we just need a Minijack connection and two Wireless Headset Microfones!

### **Lights:**

**For Streetshows:** the company provides about 2 small autonom headlights.

**On Stage or more than 150 Persons Audience:** The festival needs to provide the lights. We need warm light to create a nice atmosphere.

### **Setup:**

**Streetshow:** 30 Minutes

**Stage:** 60 Minutes

### **Breakdown:**

**Streetshow:** 20 Minutes

**Stage:** 40 Minutes

### **For the performers:**

Before the show begins, a 30-minute warm-up and preparation time is required for the performers.

Dressing rooms, or a suitable space for 2 people, equipped with a mirror and water, will be available.
